Dollywood Foundation

Dog Loves Counting is one of a series of books by the author Louise Yates. If your child likes this book you could also borrow books such as *Dog Loves Drawing*, *Dog Loves Writing* or *Dog Loves Fairy Tales* from your local library.

Counting This book is a great for counting up to the number 10. Encourage your child to count the different things like 7 stripes on the racoon or 8 legs on the spider.

There are lots of interesting facts that you could talk about based on the animals in the book. Did you know....

- that the Dodo is an extinct flightless bird that was found in Mauritius?
- that Lewis Carroll includes the Dodo in his book *Alice in Wonderland*?
- sloths can be either two or three toed. The number refers to the number of claws that each has, not toes
- a sloth only comes down from a tree once a week to poo!
